Chapter 2

DESCRIPTION

Return the the request logger (*LOG_FACILITY_TP_REQUEST*), if current is one. The log file name is returned in *filename* field, if parameter is not NULL. *bufsize* indicates the length of the output buffer. *bufsize* is optional. In case if *bufsize* is 0, the buffer length checks are not done and it is assumed that *filename* have enough space to store the value.

Chapter 3

RETURN VALUE

Function returns *1* if request logging is open. *0* if request logging is not in the progress, thus no value returned in *filename*.
