Contents

Chapter 1

SYNOPSIS

#include <ubf.h>

void B_error (char *str*);

Link with *-lubf -lnstd -lm -lpthread*

Chapter 2

DESCRIPTION

The principle is similar to **perror()** POSIX function call. Function prints the last UBF error message including user message (in *str*) to **stderr**.

Chapter 3

RETURN VALUE

Function is void and does not return value.

Chapter 4

EXAMPLE

See **ubftest/test_expr.c** for sample code.

Chapter 5

BUGS

Report bugs to support@mavimax.com
