## Chapter 1

# SYNOPSIS

*tprecover*

---

## Chapter 2

# DESCRIPTION

This is special ATMI system process which is started in standrd way by *ndrxd* process application server boot. This service shall be run in single instance (min=1 and max=1). The process performs monitoring of the *ndrxd* executable. If it sees that *ndrxd* process is dead, then it will start a new copy of *ndrxd*, which initially is put in recovery mode. During recovery mode *ndrxd* requests all running servers information about their services. Once learning mode is completed *ndrxd* will start to do sanity works, pings and other processes to keep the system in order.
