## Chapter 1

# SYNOPSIS

```
#include <ubf.h>
```

```
int CBadd (UBFH *p_ub, BFLDID bfldid, char *buf, BFLDLEN len, int usrtype);
```

Link with *-lubf -lnstd -lm -lpthread*

---

## Chapter 2

# DESCRIPTION

Add field to UBF buffer by converting given user type *usrtype* to buffer field's type (see **BFLD\_\*** types). The UBF buffer pointer is passed by *p\_ub*, field id in *bfldid*. The user field value is passed in *buf*. The *len* is used only if *usrtype* is **BFLD\_CARRAY**, for which length cannot be detected from passed data.

## Chapter 3

# RETURN VALUE

On success, **CBadd()** return zero; on error, -1 is returned, with **Berror** set to indicate the error.

## Chapter 4

# ERRORS

Note that **Bsterror()** returns generic error message plus custom message with debug info from last function call.

**BALIGNERR** Corrupted buffer or pointing to not aligned memory area.

**BNOTFLD** Buffer not fielded, not correctly allocated or corrupted.

**BNOSPACE** No space in buffer for string data.

**BMALLOC** Failed to allocate type conversion buffer.

---

## Chapter 5

# EXAMPLE

See `ubftest/ubfunit1.c` for sample code.

## Chapter 6

# BUGS

Report bugs to [madars.vitolins@gmail.com](mailto:madars.vitolins@gmail.com)
