## Chapter 1

# SYNOPSIS

```
#include <ubf.h>
```

```
void Bflddbunload(void);
```

Link with *-lubf -lnstd -lm -lpthread*

## Chapter 2

# DESCRIPTION

Function closes LMDB handlers which are open for custom field database. Function is not thread safe in respect to other Bflddb\* functions.

If DB is already closed, then function will do nothing.

Currently Enduro/X at process exist does not unload the database handles. It is expected that OS will free any IPC (semaphores) automatically.

---

## Chapter 3

# RETURN VALUE

There is no return value.

## Chapter 4

# EXAMPLE

See `atmitest/test050_ubfdb/atmiclt50.c` for sample code.

## Chapter 5

# BUGS

Report bugs to [support@mavimax.com](mailto:support@mavimax.com)
