Description

Restat tpbridge if zero message or normal traffic is not received for some given period of time.

History

#1 - 03/17/2020 11:50 PM - Madars

- Status changed from New to Resolved

- % Done changed from 0 to 100

Already implemented:

[–a INCOMING_RECV_ACTIVITY_SEC]

If set, then this is maximum time into which some packet from network must be received. If no receive activity on socket is done, the connection is reset. The 0 value disables this functionality. The default value is –z multiplied by 2. Note that checks are performed with –c interval. intervals. Usually this is used with –z, so that it is guaranteed that during that there will be any traffic.
