Description

1. Number align in xadmin psc, psrv, mibget - Numbers in columns shall be aligned to the right (as it English language states)

2.

At times svsemids prints

```
NDRX 1> svsemids
sh: 1: ❖❖:: not found
SEMAPHORE ID
-----
NDRX 1>
```

3. xadmin svqids seems to print shared mem blocks instead of semaphores:

```
NDRX 1> svqids
MSG QUEUE ID
-----
52723715
1074790404
53411845
53116934
```

1074790404 is shared mem:

```
----- Shared Memory Segments -----

0x0052e2c1 0      xx 600   56     6

0x00000000 53411845 xx 600   524288 2  dest
```

4. Is RQADDR used in epoll?

```
