

Enduro/X Core - Bug #827

tpacall() called from global transaction context with TPNOREPLY and TPNOTRAN flags fails

03/11/2024 09:58 PM - Lauris

Status:	Closed	Start date:	03/11/2024
Priority:	Normal (Code 4)	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Description tpacall() shall be able to proceed, in case if TPNOREPLY + TPNOTRAN flags used, even if caller process is within the global transaction.

Release notes

Fixed ATMI library bug, to allow the tpacall() function to work with the TPNOREPLY|TPNOTRAN flags specified, if the process is in a global transaction.
The bug appeared starting from the Enduro/X version 7.5.34, where in such case call returned the error: "4 (TPEINVAL) [Flag TPNOREPLY is not supported in global transaction mode]".
Available from Enduro/X release 7.5.40, 8.0.12+.
